

RENZ RING WIRE[®] Wire comb binding

> private RW RW 360 SRW 360 SRW 360 comfort ERW

Maximum book thickness 13.5 mm Binds up to 135 sheets

FEATURES

- + New ergonomic design guarantees straight forward, user friendly operation from start to finish
- (+) Thanks to its modular construction, the SRW 360 can be upgraded with an electric drive, creating an electric punch and manual closing machine
- (+) Compact, strong construction
- I+I Secure, dimensionally stable binding
- 1+1 Working width up to 360 mm, up to 135 sheets*
- + A quality product "Made in Germany"

*70/80 g/m² paper

private RW

The economic entry level model for manual punching and binding of A4 and A5 formats. Ideal for home use and small offices. Punches up to 10 sheets* [1 mm] and binds up to 120 sheets.

RW 360

The compact entry level model for manual punching and binding all formats up to A4. Very simple operation thanks to the ergonomic twolever system and the integrated wire holder. Punches up to 22 sheets* [2.2 mm] and binds up to 135 sheets*.

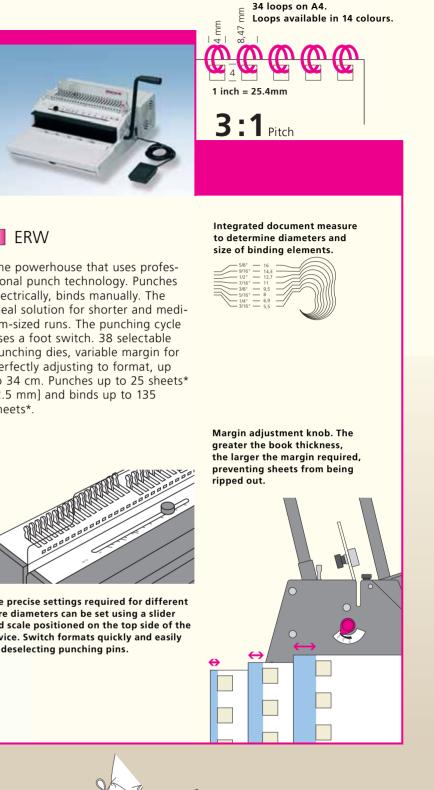

SRW 360

The universal manual punching and binding machine with the ergonomic two-lever system and easy-to-use auxiliary functions. 42 selectable punching dies, variable margin for adjusting to format perfectly, up to 36 cm. Punches margin for perfectly adjusting to forup to 22 sheets* [2.2 mm] and binds up to 135 sheets.

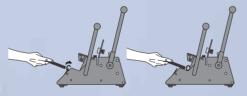

SRW 360 comfort

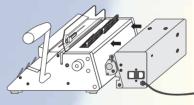

The compact electric punch, binds manually. An inexpensive solution for shorter and medium-sized runs. The punching cycle uses a foot switch. 42 selectable punching dies, variable mat, up to 36 cm. Punches up to 22 sheets* [2.2 mm] and binds up to 135 sheets*.

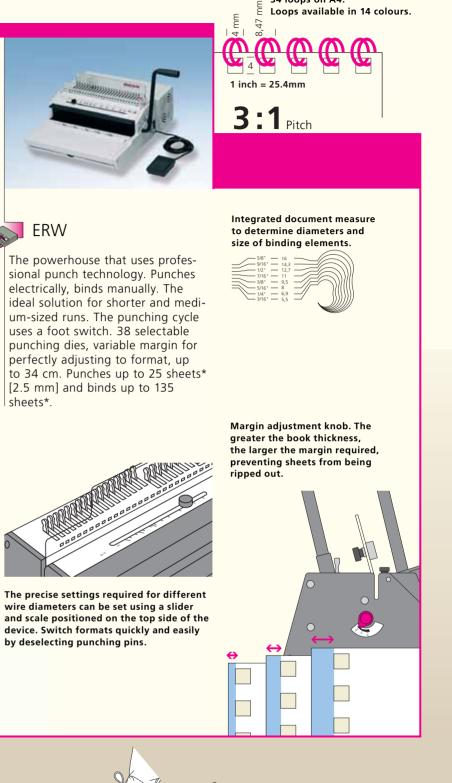

After punching, the paper can be hung on the wire comb binding element immediately. Slide the completed book into the closing unit positioned in front and close. (Example RW 360, SRW 360, SRW 360 comfort)

This generation of machines has something completely new - a modular drive. Using a novel plug-in system, the customer can now easily upgrade their old manual equipment, to create an electrically driven 'comfort' punch.

Simply plug the electrical drive into the manual equipment, and fasten tightly.

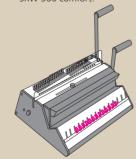

by deselecting punching pins.

The new Renz System means that even inexperienced operators can now produce perfect wire comb bindings.

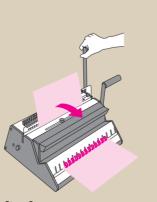

The equipment is now more ergonomic, with all steps in the process more user-friendly than ever.

OPERATION Example: RW 360, SRW 360 and SRW 360 comfort

It's this easy:

Step 1 Select the right wire comb binding element and place it on the wire holder. Set the knob to the correct diameter.

Step 2 Material for binding drops precisely into the vertical punch tray. The specially hardened cutting dies require little power to punch through layers of

Step 3 Foot switch on electrical models

paper up to 25 mm. Hang the

makes for easy operation.

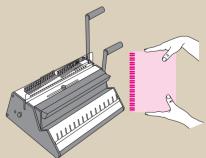

element.

punched paper on the binding

Simply slide the book with its open binding element into the closing unit in front, push the lever down and close the binding element.

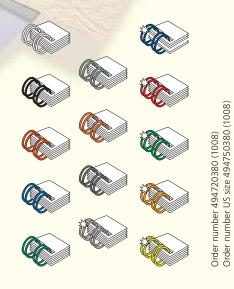

Step 4 Remove the bound product binding element.

The RENZ RING WIRE[®] wire comb binding Is available in 14 different colours, both standard and metallic.

WirePack® 3/16"-5/8" 5.5-16.0 mm
